A QUESTION.

Wouldn't you consider a man capable of doing the most intricate work, capable of doing the simple work also?

Would you consider a man capable only of doing the simple work, quite as capable for that work, as the more skillful one?

We have been getting ALL your intricate and difficult work during the years past, now let us have ALL your work which requires less skill; then note after it leaves our hands how much better it looks—see if it does not give you better satisfaction.

Your watch is one of your best friends; it merits the treatment you accord your friends.

We give it such treatment. It is our business. Ten years of satisfactory work have given us the reputation for the best; and yet we are doing better work to day than ever.

We are working just as hard to keep that reputation as we ever did to gain it. We are not content to rest easy, and let the reputation do all the work; the quality will never be lessened.

Do you know that your old key winder can be converted to a stem winder, and that it can be done so it will wind as smooth as melted butter? We have converted a number of them and can convert yours.
